or Dr. Mary Malainey, Department of Anthropology

All people can trace their history and culture back in time to the Stone Age. Archaeologists around the world have studied stone tools and the importance that stone tool making had to the continued existence of human beings

Manitoba archaeologists Gord Hill and Chris Whaley will conduct the workshop to discuss and demonstrate the ancient production of stone artifacts in Manitoba

Those wanting to learn about stone tools and stone tool technology will have the opportunity to make and take home a tool

Materials will be provided
